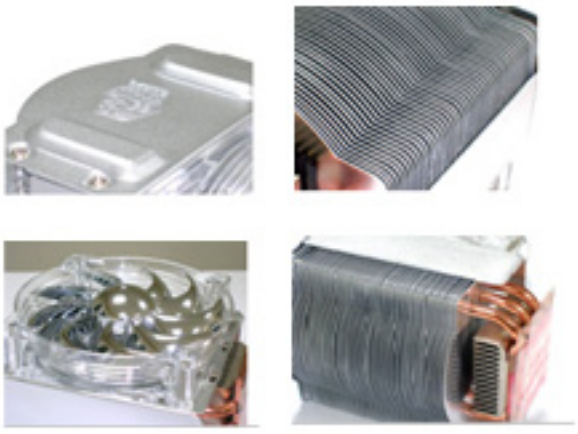
HCA-F61-GP

- Universal application for AMD AM2, Intel Core 2 Duo and LGA 775, K8 plattform
- U-shape heat pipe with large diameter and vertical fan provide an efficient and silent thermal solution
- The pure aluminum casing looks outstanding with the process of anodizing sand blasting
- The copper base with grinding treatment enables it to contact tightly on the CPU
- The best counter flow soldering tech has been used to ensure the pure copper base combining the fin and the heat pipe perfectly
- 4 pin PWM (fan speed auto-control) alloy bearing fan extents life expectancy and provides silent environment

Specifications



Fan Dimension	92 x 92 x 25 mm
H.S. Dimension	88.5 x 88.5 x 30 mm
Voltage	12V DC
Fan Speed	0~2500 rpm ± 10%
Airflow	71.95 CFM
Noise	Rifle Bearing
Life	30,000 hours
Connector	4 pin
Voltage range	7 - 13.8 V DC
